

ALL NIGHT SILENT DISCO AT NORTHERN NIGHTS

Northern Nights in collaboration with HUSHconcerts officially presents the lineup for the 2016 Silent Disco Stage! Come groove with us and hear some of your favorite artists bringing the heat deep into the night.

The Silent Disco Stage is a staple of Northern Nights. With over 2,000 headphones in circulation, our Silent Disco is one of the largest installations of its kind at any festival in the world!

This year's lineup features Gorgon City as it's headliner, with 23 other musical acts playing over the course of 3 nights, from 2am-sunrise. With Silent Disco, two DJs play directly into your headphones at the same time, so you always have a live choice on what you want to hear.

Whether you've joined us at the Silent Disco Stage before or this will be your first time, here are a few more cool facts:

- The Northern Nights Silent Disco Stage is produced by the nation's leading production company of it's kind (HUSHconcerts)
- What started as Silent Frisco in 2007, was relaunched under the name HUSHconcerts in 2015
- Founder, Robbie Kowal was the first DJ ever to play a Silent Disco in the United States (at Bonnaroo in 2006)
